AUDITOR GENERAL'S REPORT

TO THE SHAREHOLDERS AND BOARD OF DIRECTORS OF MALDIVES AIRPORTS COMPANY LIMITED

Opinion

We have audited the consolidated financial statements of Maldives Airports Company Limited and its subsidiary ("the Group"), which comprise the consolidated statement of financial position as at 31 December 2020, and the consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements give a true and fair view of the consolidated financial position of the Group as at 31 December 2020 and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRSs).

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the consolidated financial statements section of our report. We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of management for the financial statements

The board of directors is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRSs, and for such internal control as the board of directors determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the board of directors is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the board of directors either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are responsible for overseeing the Group's financial reporting process.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the board of directors.
- Conclude on the appropriateness of the board of directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the Group audit. We remain solely responsible for our audit opinion.

We communicate with Board of Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

1 Corporate information

Maldives Airports Company Limited is a limited liability company incorporated and domiciled in the Republic of Maldives. The registered office of the Company is located at Male' International Airport, Hulhule', Republic of Maldives. The principal activities of the company are maintaining and operating airports and all related activities.

The Government of Maldives (GoM) wholly owns shares of the Company.

The Group consists of the Company's interest in a subsidiary undertaking Maldives In-flight Catering Private Limited, a limited liability company incorporated and domiciled in the Republic of Maldives, operating a flight kitchen and a transit hotel in Maldives. The Company owns 65% of authorized and issued share capital of the subsidiary. Information on other related party relationships of the Group is provided in Note 30.

2 Significant accounting policies

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

2.1 Basis of preparation

The consolidated financial statements of Maldives Airports Company Limited and the Group have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB). The consolidated financial statements have been prepared on a historical cost basis, except for certain classes of property, plant and equipment and define benefit plans measured at fair value.

The preparation of financial statement in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Group's accounting policies. There are no areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant.

2.2 Basis of consolidation

a) Subsidiaries

Subsidiaries are all entities (including structured entities) over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

The acquisition method of accounting is used to account for business combinations by the Group.

Inter company transactions, balances and unrealised gains on transactions between Group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. When necessary amounts reported by subsidiaries have been adjusted to conform with the Group's accounting policies.

Non-controlling interests in the results and equity of subsidiaries are shown separately in the consolidated statement of profit or loss, statement of comprehensive income, statement of changes in equity and statement of financial position respectively.

b) Joint arrangements

Under IFRS 11 Joint Arrangements, investments in joint arrangements are classified as either joint operations or joint ventures. The classification depends on the contractual rights and obligations of each investor, rather than the legal structure of the joint arrangement. The Company has only joint ventures.

Joint ventures

Interests in joint ventures are accounted for using the equity method (refer (c) below), after initially being recognised at cost in the consolidated statement of financial position.

2.2 Basis of consolidation continued

c) Equity method

Under the equity method of accounting, the investments are initially recognised at cost and adjusted thereafter to recognise the Group's share of the post-acquisition profits or losses of the investee in profit or loss, and the Group's share of movements in other comprehensive income of the investee in other comprehensive income. Dividends received or receivable from joint ventures are recognised as a reduction in the carrying amount of the investment.

When the Group's share of losses in an equity-accounted investment equals or exceeds its interest in the entity, including any other unsecured long-term receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the other entity.

Unrealised gains on transactions between the Group and its joint ventures are eliminated to the extent of the Group's interest in these entities. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred.

The carrying amount of equity-accounted investments is tested for impairment in accordance with the policy described in note 2.4 (k)

d) Changes in ownership interests

The Group treats transactions with non-controlling interests that do not result in a loss of control as transactions with equity owners of the Group. A change in ownership interest results in an adjustment between the carrying amounts of the controlling and non-controlling interests to reflect their relative interests in the subsidiary. Any difference between the amount of the adjustment to non-controlling interests and any consideration paid or received is recognised in a separate reserve within equity attributable to owners of the Company.

2.3 Principles of consolidation and equity accounting

When the Group ceases to consolidate or equity account for an investment because of a loss of control, joint control or significant influence, any retained interest in the entity is remeasured to its fair value with the change in carrying amount recognised in profit or loss. This fair value becomes the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss.

If the ownership interest in a joint venture or an associate is reduced but joint control or significant influence is retained, only a proportionate share of the amounts previously recognised in other comprehensive income are reclassified to profit or loss where appropriate.

2.4 Summary of significant accounting policies

a) New and amended standards and interpretations

The Group applied for the first-time certain standards and amendments, which are effective for annual periods beginning on or after 1 January 2020. The Group has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

- Definition of Material amendments to IAS 1 and IAS 8
- Definition of a Business amendments to IFRS 3
- Interest Rate Benchmark Reform amendments to IFRS 9, IAS 39 and IFRS 7
- Amendments to IFRS 16 Covid-19 Related Rent Concessions

On 28 May 2020, the IASB issued Covid-19-Related Rent Concessions - amendment to IFRS 16 Leases. The amendments provide relief to lessees from applying IFRS 16 guidance on lease modification accounting for rent concessions arising as a direct consequence of the Covid-19 pandemic. As a practical expedient, a lessee may elect not to assess whether a Covid-19 related rent concession from a lessor is a lease modification. A lessee that makes this election accounts for any change in lease payments resulting from the Covid-19 related rent concession the same way it would account for the change under IFRS 16, if the change were not a lease modification.

2.4 Summary of significant accounting policies continued

2.41 b) Current versus non-current classification

The Group presents assets and liabilities in the statement of financial position based on current/non-current classification. An asset is current when it is:

- Expected to be realised or intended to be sold or consumed in the normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in the normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

The terms of the liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

The Group classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

c) Fair value measurement

The Group measures financial instruments such as derivatives, and non-financial assets such as investment properties, at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements at fair value on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

2.4 Summary of significant accounting policies continued c) Fair value measurement continued

External valuers are involved for valuation of significant assets, such as investment properties. Involvement of external valuers is determined periodically by the company in accordance with the company's procurement policy approved by the board of directors. Selection criteria include market knowledge, reputation, independence and whether professional standards are maintained.

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy, as explained above.

Fair-value related disclosures for financial instruments and non-financial assets that are measured at fair value or where fair values are disclosed, are summarised in the following notes:

- Investment Properties note 2.4(h) and 12
- Right of Use Asset note 2.4(i) and 13

d) Revenue from contracts with customers

Ramp, passenger, into-plane fuelling and other aviation related services income is recognised at the time the service is provided in accordance with the terms of the relevant contract. Cargo handling and cargo forwarding revenue is recognised at the point of departure for exports and at the point that the goods are ready for dispatch for imports. Revenue excludes value added and sales taxes and charges collected on behalf of customers.

The timing of customer billing in relation to the satisfaction of performance obligations results in amounts being recorded in the Balance Sheet for accrued and deferred income. Individual billing arrangements vary by customer and contract. Accrued income is recognised on contracts for which performance obligations have been satisfied but have not yet been billed to customers at the Balance Sheet date. When the recovery of such amounts becomes unconditional the customer is billed and the amounts are transferred to trade receivables. Deferred income is recognised in respect of payments received from customers in advance of the Group fulfilling its performance obligations under contracts.

In the distribution business, revenue has been recognised on the despatched value of goods sold, excluding valueadded tax. Product sold to retailers has been made on a sale or return basis. Revenue for goods supplied with a right of return has been stated net of the value of returns.

The performance obligation relating to the rendering of services is satisfied when the services are consumed by the customer. Revenue is recognized with reference to the time of services are rendered.

Traffic revenue is primarily generated from contracts with airlines for the provision of access to terminals, infrastructure, apron parking, airfield and terminal facilities. Revenue is recognised as the service is provided as follows:

- Navigation charges : On the basis of maximum take-off weight, when the aircraft entered into the Maldives air space.
- Landing charges : On the basis of the particular aircraft type, when the aircraft lands on the runway.
- Aircraft parking charges: Over the duration of time the aircraft is parked and maximum take-off weight.
- Ground handling : On the basis of the particular aircraft type or basis of maximum take-off weight, when the service is consumed.

Departure control system charges : On the basis of the particular aircraft type, when the service is performed and consumed by customer.

Other non traffic revenue mainly consists of provision of cargo handling and terminal services, lounge operation charges, utility sales, rent and lease charges.

- Lounge utilisation charges : On per passenger basis as they utilise.
- Cargo income : On the basis of volume handled.
- Utility charges : On the basis of volume consumed by the customer.

All the revenues are billed on a monthly basis.

2.4 Summary of significant accounting policies continued d) Revenue from contracts with customers continued

Interest income

Interest income is recognized on a time-proportion basis using the effective interest method.

Other revenues earned are recognized on the following basis:

Dividends - shareholders' right to receive the payment is established

Rental - as it accrues

Consignment commission

The Group sells souvenir items to the customers on behalf of two consigners. Consignment commission is recognised at the point in time of delivering the souvenir items to the customer, based on the rate agreed with the principals.

Income is recognized on an accrual basis in accordance with the substance of the relevant contracts.

Concession fees from retail and commercial concessionaires at the airport which are based upon reported revenue and/ or volumes by concessionaires, taking into account contracted minimum guarantees prices (variable consideration) only where applicable. The performance obligation for this revenue stream is the provision of retail unit space to a third party for the purposes of selling goods or providing services to the passengers, in return for a fee, based either on a fixed rental fee, or a concession fee based on turnover. The revenue is recognised in the period that the sales occurred, therefore at a point in time.

e) Government grants

Government grants are recognised where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. When the grant relates to an asset, it is recognised as income in equal amounts over the expected useful life of the related asset.

When the Group receives grants of non-monetary assets, the asset and the grant are recorded fair value of the asset and released to profit or loss over the expected useful life of the asset, based on the pattern of consumption of the benefits of the underlying asset by equal annual instalments.

f) Foreign currency translation

(a) Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The consolidated financial statements are presented in Maldivian Rufiyaa ("MVR") which is the Group's functional and presentation currency.

(b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in the income statement.

g) Property, plant and equipment

All property, plant and equipment, except vehicles and ground handling equipment are recognised at fair value based on periodic, valuations by external independent valuers, less subsequent depreciation. Vehicles and ground handling equipment are recognised at historical cost less depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the income statement during the financial period in which they are incurred.

2.4 Summary of significant accounting policies continued g) Property, plant and equipment continued

Increases in the carrying amounts arising on revaluation of property, plant and equipment are recognised, net of tax, in other comprehensive income and accumulated in reserves in shareholders' equity. To the extent that the increase reverses a decrease previously recognised in profit or loss, the increase is first recognised in profit or loss. Decreases that reverse previous increases of the same asset are first recognised in other comprehensive income to the extent of the remaining surplus attributable to the asset; all other decreases are charged to profit or loss. Each year, the difference between depreciation based on the revalued carrying amount of the asset charged to profit or loss and depreciation based on the asset's original cost, net of tax, is reclassified from the property, plant and equipment revaluation surplus to retained earnings.

Depreciation is calculated using the straight-line method to allocate their cost or revalued amounts, net of their residual values, over their estimated useful lives or, in the case of leased land and buildings constructed therein, the shorter lease term as follows:

| Buildings on leasehold land | 20 -50 years |
|---|--------------|
| Jetties, roads, pavements, landscaping and other structures | 50 years |
| Other buildings | 5-25 years |
| Oil store tanks | 17 years |
| Runway, taxiway and apron | 25 years |
| Machinery and equipment | 2-10 years |
| Furniture, fittings and fixtures | 3-5 years |
| Heavy vehicles | 10 years |
| Motor vehicles | 10 years |
| Crockery, cutlery, linen and fabrics | 3 years |
| Laundry. kitchen and housekeeping equipment | 5-10 years |

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each reporting date.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in the income statement. When revalued assets are sold, the amounts included in other reserves are transferred to retained earnings.

h) Investment properties

Investment property are properties held either to earn rental income or for capital appreciation or for both, but not for sale in the ordinary course of business, use in the production or supply of goods or services or for administrative purposes. Investment properties are measured at cost on initial recognition and subsequently cost less accumulated depreciation. However, Investment properties are revalued every 5 years and gains or losses arising from changes in the fair values of investment properties are included in profit

or loss in the period in which they arise, including the corresponding tax effect. Fair values are determined based on an annual valuation performed by an accredited external independent valuer.

Depreciation on investment properties is recognized on a straight line basis over the following estimated useful lives.

Buildings on leasehold land

20 - 50 years

On the disposal of an investment property, the difference between the net disposal proceeds and the carrying amount is charged or credited to the profit or loss.

Capital work- in- progress is stated at cost and includes all development expenditure and other direct costs attributable to such projects including borrowing costs capitalized. Capital work in progress is not depreciated until its completion of construction and the asset is put into use upon which the cost of completed construction works is transferred to the appropriate category of investment property.

Reclassification of property plant and equipment under investment property

The Group has decided to reclassify part of buildings from property, plant and equipment to investment property from 1 January 2017. The buildings related to investment properties were transferred at valuation and are considered as the cost of these assets from the date of transfer and subsequently measured at cost less accumulated depreciation.

2.4 Summary of significant accounting policies continued

i) Leases

The Group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Group as a lessee

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

i) Right-of-use assets

The Group recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets, as follows:

| Buildings on lease | 2 -8 years |
|--------------------|-------------|
| Leasehold land | 30-50 years |

If ownership of the leased asset transfers to the Group at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

The right-of-use assets are also subject to impairment. Refer to the accounting policies in section (k) Impairment of non-financial assets.

ii) Lease liabilities

At the commencement date of the lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating the lease, if the lease term reflects the Group exercising the option to terminate.

Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

iii) Leases at normial value from government

The Group holds lease right of its land on a long term from the government at a norminal value. Fair value recognition is applied to righ-of-use asset and the fair value of the land lease is determined based on an valuation performed by an accredited external independent valuer. Fair value of the right-of-use asset is amortized on a straight-line basis over the lease term.

Initial gain on valuation if the land is recorded as a government grant as referred in section (e) Government grants.

iv) Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exemption to its short-term leases of buildings (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered to be low value. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

2.4 Summary of significant accounting policies continued i) Leases continued

Group as a lessor

Leases in which the Group does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms and is included in revenue in the statement of profit or loss due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

j) Intangible assets

Computer software

Costs associated with maintaining computer software programmed are recognized as an expense as incurred. Development costs that are directly attributable to the design and testing of identifiable and unique software products controlled by the Group are recognized as intangible assets when the required criteria are met.

Other development expenditures that do not meet the required criteria are recognized as an expense as incurred. Development costs previously recognized as an expense are not recognized as an asset in a subsequent period.

Computer software development costs recognized as assets are amortized over their estimated useful lives, which does not exceed ten years.

k) Impairment of non-financial assets

Assets that have an indefinite useful life are not subject to amortization and are tested annually for impairment. Assets that are subject to amortization are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Non-financial assets that suffered an impairment are reviewed for possible reversal of the impairment at each reporting date.

Policy applicable from 1st January 2018

(i) Classification

From 1 January 2018, the Group classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through OCI or through profit or loss), and
- those to be measured at amortised cost.

The classification depends on the Group's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or OCI. For investments in equity instruments that are not held for trading, this will depend on whether the Group has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income (FVOCI).

The Group reclassifies debt investments when and only when its business model for managing those assets changes.

(ii) Recognition and derecognition

Regular way purchases and sales of financial assets are recognised on trade-date, the date on which the Group commits to purchase or sell the asset. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Group has transferred substantially all the risks and rewards of ownership.

(iii) Measurement

At initial recognition, the Group measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss (FVPL), transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVPL are expensed in profit or loss.

AND REALLY AND

Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payment of principal and interest.

2.4 Summary of significant accounting policies continued k) Financial assets (Non-derivative) continued

Debt instruments

Subsequent measurement of debt instruments depends on the Group's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the Group classifies its debt instruments:

- Amortised cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. Interest income from these financial assets is included in finance income using the effective interest rate method. Any gain or loss arising on derecognition is recognised directly in profit or loss and presented in other gains/(losses) together with foreign exchange gains and losses. Impairment losses are presented as separate line item in the statement of profit or loss.
- FVOCI: Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through OCI, except for the recognision of impairment gains or losses, interest income and foreign exchange gains and losses which are recognised in profit or loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in other gains/(losses). Interest income from these financial assets is included in finance income using the effective interest rate method. Foreign exchange gains and losses are presented in other gains/(losses) and impairment expenses are presented as separate line item in the statement of profit or loss.
- FVPL: Assets that do not meet the criteria for amortised cost or FVOCI are measured at FVPL. A gain or loss on
 a debt investment that is subsequently measured at FVPL is recognised in profit or loss and presented net within
 other gains/(losses) in the period in which it arises.

Equity instruments

The Group subsequently measures all equity investments at fair value. Where the Group's management has elected to present fair value gains and losses on equity investments in OCI, there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment. Dividends from such investments continue to be recognised in profit or loss as other income when the Group's right to receive payments is established.

Changes in the fair value of financial assets at FVPL are recognised in other gains/(losses) in the statement of profit or loss as applicable. Impairment losses on equity investments measured at FVOCI are not reported separately from other changes in fair value.

(iv) Impairment

From 1 January 2018, the Group assesses on a forward looking basis the expected credit losses associated with its debt instruments carried at amortised cost and FVOCI. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

For trade receivables, the Group applies the simplified approach permitted by IFRS 9, which requires expected lifetime losses to be recognised from initial recognition of the receivables, see note 32 for further details.

I) Inventories

Inventories are stated at the lower of cost and net realizable value. Cost is determined using the first in first out method and weighted average cost method. Cost of inventory includes purchases, transport and handling costs. Net realizable value is the estimated selling price in the ordinary course of business, less the costs of completion and variable selling expenses. Where necessary, provision is made in the financial statements for obsolete, slow-moving and defective inventory.

Group value its inventory as below;

Cost formulae used FIFO Weighted average **Inventory type** Fuel, spare parts and consumables Duty-free

2.4 Summary of significant accounting policies continued

m) Trade receivables

Trade receivables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method, less loss allowance. The Group holds the trade receivables with the objective to collect the contractual cash flows. See note 19 for further information about the Group's accounting for trade receivables and note 32 for a description of the Group's impairment policies.

n) Cash and cash equivalents

Cash and cash equivalents includes cash in hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less.

o) Share capital

Ordinary shares are classified as equity.

p) Borrowings

Borrowings are recognized initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated after adjusting the interest accrued, repayments of principal and interest. Interest on borrowings are recognized on accrual basis.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date or if the borrowings are only repayable on the availability of net cash flows of the Group and such availability is not anticipated for at least 12 months after the reporting date.

q) Borrowing costs

General and specific borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

All other borrowing costs are recognized in profit or loss in the period in which they are incurred.

r) Provisions

Provisions are recognized when the Group has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated. Provisions are not recognized for future operating losses.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognized even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a rate that reflects current market assessments of the time value of money and the risks specific to the obligations.

s) Current and deferred business profit tax

The tax expenses for the period comprises current and deferred tax. Tax is recognized in the income statement, except to the extent that it relates to items recognized directly in equity.

The current business profit tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the reporting date. Management periodically evaluates positions taken in tax computation with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

The Group is liable to business profit tax at rate of 15%, if the taxable profit of the year exceeds MVR 500,000.

2.4 Summary of significant accounting policies continued s) Current and deferred business profit tax continued

Deferred business profit tax is recognized, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However deferred business profit tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred business profit tax is determined using tax rates that have been enacted or substantially enacted by the reporting date and are expected to apply when the related deferred business profit tax asset is realized or the deferred business profit tax liability is settled.

Deferred business profit tax assets are recognized only to the extent that it is probable that future taxable profit will be available against which the temporary difference can be utilized.

Deferred business profit tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred business profit tax assets and liabilities relate to business profit taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

t) Employee benefits

Short-term obligations

Liabilities for wages and salaries, including non-monetary benefits and annual leave that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognised in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as other payables in the balance sheet.

Defined contribution plan

A defined contribution plan is a post-employment benefit plan under which the Group pays fixed contributions to Maldives Government pension scheme and will have no legal or constructive obligation to pay further amounts. Both employer and employee contribute 7% to this scheme of such employees' pensionable wage. Employers' obligation for contribution to pension scheme is recognised as an employee benefit expense in the income statement in the periods during which services are rendered by employees. All Maldivian employees of the Group are members of the retirement pension scheme established in the Maldives.

Defined benefit plans

Defined benefit plans is an amount of benefit that an employee receive on retirement, usually dependent on one or more factors such as age, completed years of service and compensation. The Group's net obligation in respect of defined benefit plans are calculated by estimating the amount of future benefit that employees have earned in return for their service in the current and prior periods and discounting that amount to determine its present value. Discounting was done by using the Maldives Government treasury bills interest rate as there is no deep corporate bond market in Maldives. The calculation was performed by a qualified actuary, Messrs Charan Gupta Consultants Pvt Ltd in India, using the projected unit credit method.

The interest cost is calculated by applying discounting rate to the opening balance of the defined benefit obligations. This cost is included in employee benefit expense in the consolidated statement of statement of profit or loss.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, directly in other comprehensive income. They are included in retained earnings in the consolidated statement of changes in equity and in the consolidated statement of financial position.

Changes in the present value of the defined benefit obligation resulting from plan amendments or curtailments are recognised immediately in profit or loss as past service costs.

u) Dividend distribution

Dividend distribution to the Group's shareholders are recognized as a liability in the Group's financial statements in the period in which the dividends are approved by the Group's shareholders.

2.4 Summary of significant accounting policies continued

v) Fair value estimation

The nominal value less impairment provision of trade receivables and payables are assumed to approximate their fair values. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the Group for similar financial instruments.

w) Comparatives

Where necessary, comparative figures have been adjusted to conform with changes in presentation in the current year.

2.5 Use of estimates and judgements

The preparation of financial statements requires the use of accounting estimates which, by definition, will seldom equal the actual results. Management also needs to exercise judgement in applying the group's accounting policies.

This note provides an overview of the areas that involved a higher degree of judgement or complexity. Detailed information about each of these estimates and judgements is included in other notes together with information about the basis of calculation for each affected line item in the financial statements. The areas involving significant estimates or judgements are:

- Loss allowance for expected credit losses note 2.4(k), 19.1 and 19.2
- Estimated useful life of property plant and equipment note 2.4(g) and 9
- Estimated useful life of intangible asset note 2.4 (j) and 14
- Estimation uncertainties and judgements made in employee retirement benefits note 2.4(t) and 27
- Estimation uncertainties and judgements made in relation to lease accounting note 2.4(i) and 13.1
- Estimation of fair values of buildings and investment property note 2.4(h) and note 12
- Estimation of fair values of leasehold right of the land note 2.4(i) and 13

Other disclosures relating to the Group's exposure to risks and uncertainties includes:

- Financial risk factors and policies note 32.1
- Capital risk management 32.2

6.1 Business profit tax on profit

Government of Maldives has enacted the Income Tax Act on 04 December 2019 and income tax has been calculated at 15% on the taxable profit for the year ended in accordance with the Income Tax Act No. 25/2019. A reconciliation between tax expense and the product of accounting profit multiplied by Maldives's domestic tax rate for the year ended 31 December is as follows:

| | 2020 MVR | 2019 MVR | 2020 MVR | 2019 MVR |
|---|-------------|---------------|-------------|---------------|
| Profit before tax | 80,734,984 | 1,490,866,684 | 87,542,723 | 1,315,254,657 |

| Airport Investments Maldives Private Limited | 5,000,000 | 5,000,000 | |
| Provision for impairment of investment in joint ventures | (5,000,000) | (5,000,000) | |
| At 31 December | | - | |

The Company hold 33.33% interest in Airport Investments Maldives Private Limited, a jointly controlled entity which was mandated to develop airports, lease, operate or manage tourist resorts and carry on all aspects of business connected with airport and tourist resort operations either by directly providing the services or by contracting the provision of services to third parties.

Currently there is no operation in the Company and remains dormant.

The Board of Directors has decided to impair the investments in Airport Investments Maldives Private Limited since material uncertainties exist which cast significant doubt about the ability of the companies to continue as a going concern.

17 Financial assets at fair value through other comprehensive income (FVOCI)

| Provision for impairment of financial assets | (32,000,000) | (32,000,000) | (32,000,000) | (32,000,000) | | | |
| | - | - | - | - | | | |

The Company initially acquired 20,000 shares which represented 32.26% of the issued share capital of Addu International Airport Private Limited, an entity involved in the development of airports, tourist resorts, and carry on all aspects of business connected with airports and tourist resort operations either by directly providing the services or by contracting the provision of services to third parties. On 1 January 2013, the investee Company issued 118,000 shares to other shareholders diluting the shareholding of MACL to 10%. The Company has recognised the investment at cost in consolidated financial statements resulting from the loss of control.

During the year ended 31 December 2017, MACL has invested MVR 12,000,000 as the call up equity according to the shareholdings of the Company.

These investments in equity instruments are not held for trading and therefore the group has made an irrevocable election at the date of initial implementation of IFRS-9 to account for these equity investments at fair value through other comprehensive income (FVOCI).

The Board of Directors has decided to impair the Addu International Airports Company Limited since material uncertainties exist which cast significant doubt about the ability of the companies to continue as a going concern after an impairment assessment based on the future cash flows.

The company has paid first insallment of the during the year 2020.

The Company had obtained a term facility from China Development Bank (CDB) for the purpose of financing the saeplance facilities development project. The total facility of this loan is US\$ 47,170,000 and as of 31 December 2020, the company has fully withdrawn the loan. Repayment of this loan shall be paid in twenty-one equal installments, paid semi-annually, starting from March 2021. The interest charged for this facility is base 2.9%+LIBOR p.a.

26 Deferred tax liabilities

The analysis of deferred tax assets and deferred tax liabilities is as follows:

| | Grou | Group | | ny |
|--------------------------|--------------|--------------|--------------|--------------|
| | 2020 | 2019 | 2020 | 2019 |
| | MVR | MVR | MVR | MVR |
| Deferred tax assets | (99,485,067) | (69,616,946) | (84,846,522) | (58,728,060) |
| Deferred tax liabilities | 48,899,241 | 50,211,740 | 48,889,156 | 57,565,284 |
| | (50,585,827) | (19,405,207) | (35,957,366) | (1,162,776) |

26.1 Deferred taxes are calculated on all temporary differences under the liability method using the effective tax rate of 15%. The movement in deferred tax is as follows:

| At 1 January | (19,405,207) | 43,447,916 | (1,162,776) | 53,330,980 |
|---|--------------|--------------|--------------|--------------|
| Charge to income statement | (28,314,938) | (58,135,752) | (31,928,908) | (49,776,385) |
| Charge other comprehensive Income | 949,921 | (1,097,784) | 949,921 | (1,097,784) |
| Credit deferred tax liability reversal on realised revaluation surplus | (3,815,603) | (3,619,588) | (3,815,603) | (3,619,588) |
| At 31 December | (50,585,827) | (19,405,207) | (35,957,366) | (1,162,776) |

The movement in deferred tax assets and liabilities of the Group and Company during the year, without taking into consideration the offsetting balances are as follows:

| Net deferred tax (asset) / liability | (35,957,366) | (19,405,205) | (35,957,366) | (1,162,776) |
|--------------------------------------|---------------|---------------|---------------|---------------|
| Tax rate | 15% | 15% | 15% | 15% |
| | (239,715,775) | (129,368,044) | (239,715,775) | (7,751,843) |
| On defined benefits obligations | (246,919,946) | (234,782,673) | (246,919,946) | (234,782,673) |
| On debtors general provision | (202,441,309) | (187,826,823) | (202,441,309) | (156,737,728) |
| On employee pension provision | - | - | - | - |
| On right-of-use assets | - | (41,503,479) | - | 245,554 |
| On property, plant and equipment | 209,645,480 | 334,744,931 | 209,645,480 | 383,523,004 |
| | | | | |

27 Employee retirement benefits obligations

| | Group | | Company | |
|-------------------------------|-------------|-------------|-------------|-------------|
| | 2020 | 2019 | 2020 | 2019 |

| Current service cost | 15,937,455 | 15,255,827 | 15,937,455 | 15,255,827 |
| Interest charge | 10,800,003 | 9,477,954 | 10,800,003 | 9,477,954 |
| Actuarial gain on obligation | (6,332,808) | 7,318,558 | (6,332,808) | 7,318,558 |
| | 255,187,323 | 238,094,812 | 255,187,323 | 238,094,812 |
| Less: payment during the year | (8,267,377) | (3,312,139) | (8,267,377) | (3,312,139) |
| Closing balance | 246,919,946 | 234,782,673 | 246,919,946 | 234,782,673 |

Following amounts are recognized in profit or loss during the year in respect of retirement benefit obligation

| Amount Recognized in Profit or Loss | | | | |
|-------------------------------------|------------|------------|------------|------------|
| Current service cost | 15,937,455 | 15,255,827 | 15,937,455 | 15,255,827 |
| Interest charge | 10,800,003 | 9,477,954 | 10,800,003 | 9,477,954 |
| | 26,737,458 | 24,733,781 | 26,737,458 | 24,733,781 |

Amount recognized in income statementAmount Recognized in Other Comprehensive Income

| Actuarial loss/(gain) on obligation | (6,332,808) | 7,318,558 | (6,332,808) | 7,318,558 |
|-------------------------------------|-------------|-----------|-------------|-----------|
| | (6,332,808) | 7,318,558 | (6,332,808) | 7,318,558 |

The retirement benefit obligation of the Company is estimated based on the calculation performed by the actuarial valuer. The projected unit credit method is used to determine the present value of the defined benefit obligation. Key assumptions used in the calculation are as follows:

| | 2020 | 2019 |
|---------------------------|--------|--------|
| Management level: | | |
| Discount rate | 4.60% | 4.60% |
| Expected salary increment | 2.39% | 2.78% |
| Staff turnover factor: | | |
| Up to 30 years | 6.27% | 6.27% |
| From 31 to 44 years | 2.07% | 2.07% |
| Above 44 years | 1.08% | 1.08% |
| Operational level: | | |
| Discount rate | 4.60% | 4.60% |
| Expected salary increment | 3.54% | 0.32% |
| Staff turnover factor: | | |
| Up to 30 years | 11.52% | 11.52% |
| From 31 to 44 years | 3.53% | 3.53% |
| Above 44 years | 2.50% | 2.50% |

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions is:

| | | Impact on def obliga | |
|--------------------|--------------------------|-------------------------|------------------------|
| | Change in assumption (%) | Increase in assumption | Decrease in assumption |
| | | 2020 | 2020 |
| | _ | MVR | MVR |
| Discount rate | 0.50% | (14,479,916) | 15,900,725 |
| Salary growth rate | 0.50% | 16,207,778 | (14,871,937) |

The liability for defined benefit obligations is not externally funded.

27 **Employee retirement benefits obligations (continued)**

Sensitivities due to mortality and withdrawals are not material and hence impact of change due to these were not calculated.

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the defined benefit liability recognised in the balance sheet.

32 Events after the reporting period

31

On 9 February 2021, company has accepted request from customers for COVID-19 insentives on rent of food and bevarage outlets. Agreed incentives included net discounts of MVR 17,808,077 for periods related to financial year 2020.

This amount has been adjusted as at 31 December 2020.

No other events have occurred since the reporting date, which would require adjustments to, or disclosure in, the financial

32 Financial risk management

32.1 Financial risk factors

The Group's activities expose it to a variety of financial risks: market risk (including foreign exchange risk), credit risk, liquidity risk and cash flow and fair value interest rate risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Group's financial performance.

Risk management is carried out by the Board of Directors on specific areas such as foreign exchange risk, credit risk and liquidity risk.

(a) Market risk

(i) Foreign exchange risk

The Group's operations are exposed to foreign exchange risk arising from various currency exposures. Foreign exchange risk arises from future commercial transactions and recognized assets and liabilities. The company has a substantial portion of its revenue realised in United States Dollar. Currency exposure arising from the import of capital items and other materials are presently met out of revenue received in United States Dollars.

The Group's exposure to foreign currency risk at the end of the reporting period was as follows:

| | 31 December 2020 | | 31 Decembe | r 2019 |
|-------------------------------|------------------|----------|---------------|---------|
| | US\$ | SGD | US\$ | SGD |
| Cash and cash equivalents | 59,030,624 | - | 83,642,742 | - |
| Trade and other receivables | 19,216,566 | - | 52,314,066 | 327,388 |
| Investments in fixed deposits | 10,493,755 | - | 10,400,578 | - |
| Trade and other payables | (53,605,925) | (16,258) | (40,646,769) | - |
| Borrowings | (439,578,652) | - | (439,578,652) | - |
| | (404,443,631) | (16,258) | (333,868,036) | 327,388 |

Sensitivity analysis

5 percent strengthening/ weakening of Maldivian Rufiyaa against United States Dollars and Singapore Dollar as at 31 December 2020 and 31 December 2019, would have increased/ decreased profit by the amount shown below, based on the Group's monetary assets and liabilities. The analysis assumes that all other variables remain constant.

| | Strengthening | Weakening |
|------------------------|---------------|-------------|
| 31 December 2020 | | |
| US\$ 5% movement | (311,826,040) | 311,826,040 |
| SGD 5% movement | (9,464) | 9,464 |
| 31 December 20219 | | |
| US\$ 5% movement | (257,412,256) | 257,412,256 |
| SGD 5% movement | 187,030 | (187,030) |
| Financial risk factors | | |

| | Average r | ate | As at 31 Dec | cember |
|------------|-----------|--------|--------------|--------|
| | 2020 | 2019 | 2020 | 2019 |
| 1 MVR: SGD | 0.0902 | 0.0884 | 0.0859 | 0.0875 |
| 1 MVR: USD | 0.0649 | 0.0649 | 0.0649 | 0.0649 |

In respect of the monetary assets and liabilities denominated in US\$, the Group has a limited currency exposure on such balances since the Maldivian Rufiyaa is pegged to the US\$ within a band to fluctuate within +/- 20% of the mid-point of exchange rate.

(ii) Cash flow and fair value interest rate risk

The Group has short-term deposits with commercial banks and investments in Government treasury bills, which are the interest bearing assets. The Group also has fixed interest bearing borrowings. The Group does not have any control over interest rate or any hedge instrument to manage the risk arising out of fixed interest rate.

32 Financial risk management (continued)

(b) Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, the availability of funding through an adequate amount of committed credit facilities and the ability to close out market positions. The Group aims to maintain liquidity by keeping adequate cash and short-term deposits in banks.

The table below analyses the Group's financial liabilities into relevant maturity groupings based on the remaining period at the reporting date to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows.

Group

| At 31 December 2020 | Less than 3 months | Between 3 months and 1 Year | 1 and 2 Years | 2 Years and above |
|---|---|--------------------------------|------------------|----------------------|
| Trade and other payables | 1,410,083,330 | - | - | - |
| Borrowings | 51,462,065 | 288,526,853 | 479,215,765 | 6,822,186,869 |
| At 31 December 2019 | | | | |
| Trade and other payables | 1,701,511,546 | - | - | - |
| Borrowings | 11,763,377 | 160,063,808 | 308,426,786 | 6,298,048,844 |
| Company | | | | |
| | | | | |
| At 31 December 2020 | Less than 3 months | Between 3 months and 1 Year | 1 and 2 Years | 2 Years and above |
| | | | | |
| At 31 December 2020 Trade and other payables Borrowings | Less than 3 months 1,383,080,796 51,462,065 | | | |
| Trade and other payables | 1,383,080,796 | and 1 Year | 2 Years | and above |
| Trade and other payables Borrowings | 1,383,080,796 | and 1 Year | 2 Years | and above |

(c) Credit risk

Credit risk arises from cash and cash equivalents, contractual cash flows of debt investments carried at amortised cost, at fair value through other comprehensive income (FVOCI) and at fair value through profit or loss (FVPL), and deposits with banks and financial institutions, as well as credit exposures to ordinary customers, including outstanding receivables.

(i) Risk management

Most of the aero customers are reputed airlines with the global presence and non aero customer mainly includes government related SOEs. If there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. The compliance with credit limits by customers is regularly monitored by line management.

(ii) Security

For some trade receivables the Group obtains security in the form of bank guarantees and cash deposits. i.e. bank guarantee vary for 1 to 3 months, which can be called upon if the counterparty is in default under the terms of the agreement.

(iii) Impairment of financial assets

The Group has following financial assets that are subject to IFRS 9's expected credit loss model:

- Trade receivables others and related parties
- Other receivables
- Other financial assets at amortised cost
- Financial assets at fair value through other comprehensive income (FVOCI)
- Investment in fixed deposits
- Cash and cash equivalents

While investment in financial assets at fair value through other comprehensive income (FVOCI), investment in fixed deposits, other financial assets at amortised cost and cash and cash equivalents are also subject to the impairment requirements of IFRS 9, the identified impairment losses were immaterial.

32 Financial risk management (continued)

- Trade receivables - others and related parties

The Group applies the IFRS 9 simplified approach of measuring expected credit losses which uses a lifetime expected loss allowance for all trade receivables.

To measure the expected credit losses, trade receivables have been grouped based on shared credit risk characteristics and the past experience on recovery and default.

- Trade receivables - others and related parties (continued)

The expected loss rates are based on the payment profiles of sales over a period of 48 months and 36 months before 31 December 2019 or 31 December 2018 respectively and the corresponding historical credit losses experienced within this period. The historical loss rates are adjusted by a loss allowance matrix developed by the Group considering the macroeconomic factors affecting the ability of the customers to settle the receivables. The Group has selected GDP of the region/ country of the customer and/ or jet fuel price to be most relevant factors. Accordingly developed a loss allowance matrix based on expected changes in the GDP of the region/ country and/ or jet fuel price and applied to the historical loss rates.

On that basis, the loss allowance of the Company as at 31 December 2020 and 31 December 2019 was determined as follows for trade receivables that were subjected to expected credit loss calculation.

Scheduled airlines

| 31st December 2020 | Current | Past due less than 30 days | Between 31 days and 60 days | Between 61 days and 90 days | More than 90 days past due | Total |

- Receivables from Government Ministries and Departments

Receivables from Government Ministries and Departments consist of other receivables and portion of trade receivables from related parties. The Company assesses the credit quality of its receivables Government Ministries and Departments taking into account their financial position, past experience and other factors. The Company is dealing with Government Ministries and Departments and has not experienced historical credit losses during the past years. Therefore, expected credit loss allowance for receivables Government Ministries and Departments were determined by considering the loss of time value of money. The Company management calculated the expected credit losses on these assets by discounting the future cash flows using the Company's weighted average cost of capital.

On that basis, the Company's the loss allowance for receivables from Government Ministries and Departments as at 31 December 2020 and 31 December 2019 were as follows:

| | 31 December 2020 | 31 December 2019 |
|---------------------------------------|------------------|------------------|
| Gross carrying amount | | |
| - Trade receivables - related parties | 6,813,645 | 74,598,781 |
| - Other receivables | 57,988,535 | 619,783,560 |
| Loss allowance | | |
| - Trade receivables - related parties | 211,388 | 388,872 |
| - Other receivables | 1,689,744 | 22,267,328 |

Provision for government has substantially reduced as majority government receivables due as at 31st December has been recovered during the year 2020 and the balance is expected to be recovered in the next year.

32.2 Capital risk management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends payable to shareholders, issue new shares or sell assets to reduce debt.

The Group monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings (including trade and other payable) less cash and cash equivalents. Total capital is calculated as 'equity', as shown in the consolidated statement of financial position, plus net debt.

32.2 Capital risk management (Continued)

The gearing ratios at 31 December 2020 and 31 December 2019 were as follows:

| | Group | | Compa | any |
|---|-----------------|-----------------|----------------|-----------------|
| | 2020 | 2019 | 2020 | 2019 |
| | MVR | MVR | MVR | MVR |
